Stadur Universal

Systematic Base Insulation

System

Energy saving with the base insulation of heated halls - efficient, and easy to handle with: Stadur Universal panel, corner bracket, end piece and special adhesive. Thermal bridges are excluded due to the standard grooves and accurately fitting loose tongues.

The base insulation panels are made of moisture-resistant extruded polystyrene with a weather-resistant special coating. The panels can be quickly and reliably glued to the foundation with all solvent-free adhesives. The surface enables coloured coatings, rough plaster or even tiling.

Advantages

- high energy savings
- optically attractive
- resistant
- weatherproof
- paint coating possible
- suitable for rough plaster or tiles
- upon request also with a surface with a plastic or coated aluminium finish

Technical Data:

Formats: 2500 x 600 / 1200 mm
Thickness: 40 mm (U-value = 0.70)
60 mm (U-value = 0.48)
80 mm (U-value = 0.37)

Standard corner bracket 90°: 300 x 300 x 600/1200 mm
Standard end pieces: 300 x 600 / 1200 mm
Loose tongues: approx. 55 x 18 x 1200 mm and approx. 55 x 18 x 600 mm

Special formats and special brackets possible upon request.

Gluing of loose tongues possible e.g. with Allfix 100 construction adhesive.

When processing, please consider the material expansion - linear expansion coefficient: 0.07 mm/m· K.
