

### Air slot profile

These elements are equipped with a special milling for the installation of window ventilators and are suitable for supplying fresh air.

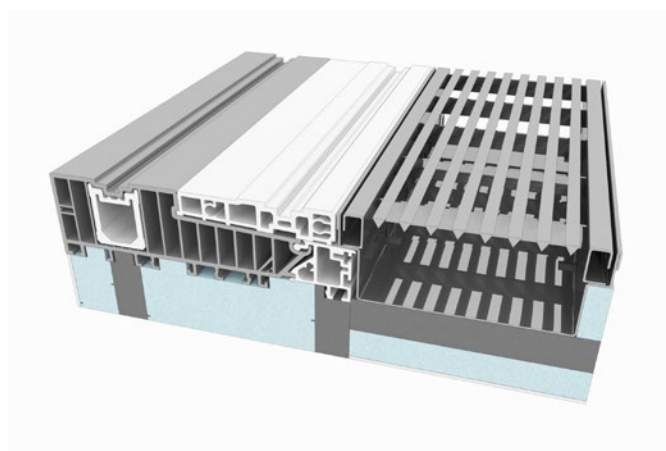

Cut to length, height and tread depth including a contour milling on one side, they can be used for all profile systems.

### Stadurlon FrameTec corner angle

The optimal solution to prevent thermal bridges in corners.

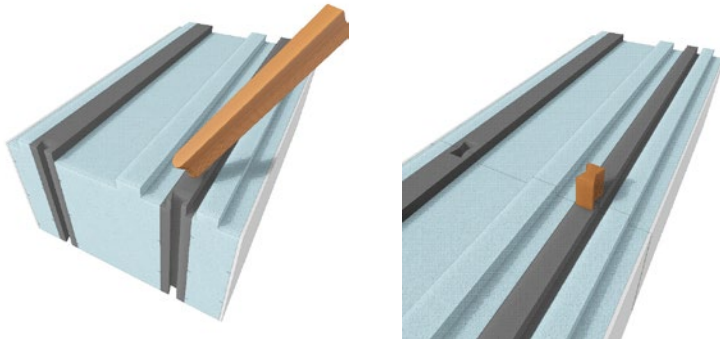

Fast, easy and clean.

### Terrace gutter

The easiest solution for a barrier-free doorstep including a drainage channel.

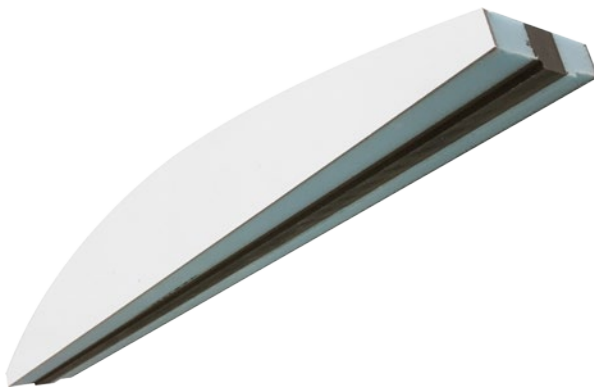

Creates smooth transitions without any problems.

### Hoffmann-Schwalbe

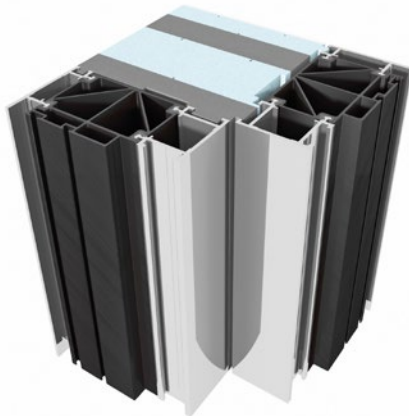

Clean and solid connection between subbase elements without protracted drying periods of adhesives.

Connects leftover pieces in order to reduce cutting waste.

### Round Arch

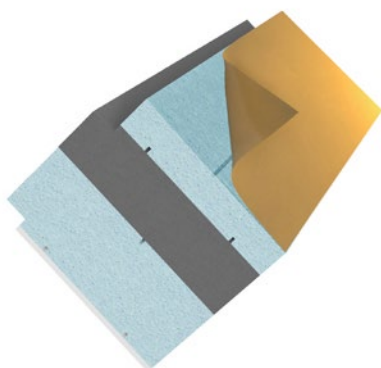

Cut to length, height, radius and tread depth including a contour milling on one side, they can be used for all profile systems.

### Corner post

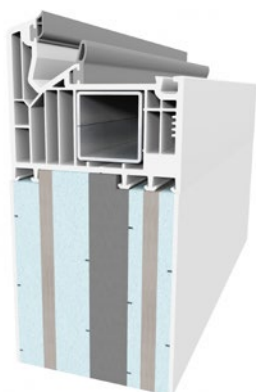

The optimal solution for an insulated corner post of a profile system.

Cut to length, height and tread depth with a contour milling on both sides, they can be used for all profile systems.

### Stadurlon FT/SKS Self-adhesive Foam

The ideal solution for easy bonding of metals and high-energy plastics (i.e. ABS, laminate, polished wood, stone, glas)

### Stadur FT/Phon Sound Insulation

Special soundproofing elements with DIN EN ISO 10140-2:2010 test certificates.

dB-value up to 45
